IN ALMSHOUSES AND PRISONS, IST DIRECT WIRE TO THE TIMEA.

WASHINGTON, May 22.—(Exclusive Dispatch.) Officials of the Immigration Bureau are alarmed over the constantly-growing number of aliens in the almshouses and prisons of the United States, especially in New York City and State. The increase has been so great recently that Commissioner of Immigration Sargent a few growths ago instituted an investigation of the subject, and the preliminary returns show the appalling rate at which forcigners are being sent to prison and maintained in almshouses, hospitals and various other institutions of this character.

It is shown that in New York State, the total alien inmates of all institutions of the character described is 13,143. Information is being secured by Sargent to be submitted to Congress at its next seasion. An effort is to be made to enact more stringent laws, requiring rigid exclusion of persons liable to become public charges through crime or poverty.

CALIFORNIAN TO PRESIDE.

Williams of Grass Valley the Chairman of Miners.

Most Important Convention Yet Held by Federation.

Open Meetings to be Agitated. Affilation Projected.

THY THE ASSOCIATED PRESS-P.M.I. DENVER, May 22.-Tomorrow will mark the opening of the tweifth an-nual convention of the Western Federation of Miners. This will probably be the most important convention ever held by the organization.
Over 250 delegates, representing "lo-

cals" scattered throughout Colorado, Arizona, British Columbia, Montana. Idaho, Kansas, Minnesota, Michigan New Mexico, California, Oregon, Utah. South Dakota, Washington, Wyoming and Alabama, will be in attendance. In the absence of President Moyer, who is still detained by the military in Telluride, Vice-President J. C. Willlams of Grass Valley, Cal., will preside over the gathering, which will be in

session ten days.

Perhaps the most important matter
to be discussed will be the question
of open meetings of local lodges affillated with the federation. For years, it is claimed, detectives have either joined the unions themselves, disguised as miners, or have sent miners into the meetings to see what has been going on, in this way learning the work of the organization. In order to pre-vent this, the Executive Committee has decided to recommend to the convention that meetings of local unions hereafter be open to all who choose

hereafter be open to all who choose to attend.

While the miners are striking for an eight-hour day, the federation will make another determined effort to have the eight-hour law passed at the coming season of the Legislature. Steps will be taken by the convention to work for the election of such legislators as are favorable to such a law. It appears to be the sease of the miners that they shall not place any tickets of their own in the field, but "so down the line" for the party which they believe best favors them.

It is believed that President Moyer, Secretary Haywood and the executive board, with possibly one or two changes, will be redicted.

Another matter of great importance will be the discussion of the affiliation with the American Federation of Labor. The Executive Council of the latter body at its meant this city arranged for the spound of a committee to with on the convention of the Western Federation of Miners and urge that organization to affiliate with the American Federation

of Labor.

Max Morris of this city, who is fourth vice-president of the American Federation of Labor, has just received a telegram from President Gompers, naming himself, President Mahon of the International Association of Streetear Men; R. Cornelius of the San Francisco Streetear Employés, and Cris Evans of the United Mine Workers of America as the committee to represent the American Federation of Labor.

will be held.

At a meeting of the clerks and foremen, it was decided to continue the
struggle. Unless conditions change,
the Joy line and the Metropolitan, as
well as the Portland line, may be tied
up tomorrow. The Clyde line also may

suffet.

Members of the Civic Federation again met the strikers with an offer of concillation. The men declared that they have received no proposition from the company looking to the settement of the difficulty, but that they are willing to submit grievances.

In wages and changed working condi-tions.

Included in the demands to be made will be a jurisdictional claim by the butchers and other workmen that threatens the livelihood of 1000 women employed in the yards. The men claim that women have been trespassing on their fields of labor, not so much in Chicago as in other packing centers, and a demand is to be made that wom-en be employed in specified lines of work.

GLOBE (Aris.) May 22.—(Exclusive Dispatch.] The Globe Miners' Union has made a formal announcement that it will no longer abide by the terms of the agreement of October 15, 1902, made between the union mining companies and the leading business houses of Globe. The agreement conceded the companies the right to employ whom they would, provided the wages be kept at \$3.50 a day for underground, and \$3 for surface work. The only excuse of the union is that "conditions have changed." As extensive work is contemplated by the Globe companies, this action is understood as indicating a strike for union recognition.

HARRIMAN'S NEW HOME. Half a Million Dollars to be Expend on an Estate in the Ramapo

(BY DIRECT WIRE TO THE TIMES.)

MIDDLETOWN (N. Y.) May 22.—
(Exclusive Dispatch.) Surveys have been completed and work will be begun immediately on E. H. Harriman's \$500,000 home, which is to be built on the summit of Tower Hill at Arden, Orange county. Harriman, who has planned the house for a long time, but had been unable to devote any time to the details of construction until now, visited his estate Saturday. The house on Tower Hill will follow the lines of an Italian villa, and will be on the shores of Forest Lake, a magnificent artificial body of water.

Tower Hill is the highest peak of the Ramapo Mountains. On one of the nearby peaks, Harriman has built on observatory, on which are glaced powerful telescopes. By the time workmen are ready to receive building material, a railroad will lead from the main line to Eris, Just north of Arden, up the mountain to the house. The road will be nearly a mile long. To reach the same point by wagon would require five miles to travel. The railroad will be, sequipped with passenger and freight cars, electric power being furnished by water from Cranberry Lake. The road will be double-tracked. When Harriman's plans are complete he will have one of the finest estates in the

SAN FRANCISCO, May 21.—[Exclusive Dispatch.] George Nethercott's two Sacramento dogs, Barge and Pocatelli, were matched against each other for the first time in the stake event at Union Coursing Park today, and the for the first time in the state event at Union Coursing Park today, and the long-discussed question as to which is the faster greyhound was settled in favor of Barge. By winning three straights from Pocatelli, Barge won the Grand National championship, and the way he gained the title of champion showed he deserves it. There was little doubt among the best of the talent at the start that Barge and Pocatelli were the best of the eight dogs entered in the Grand National, but there has always been considerable doubt as to which of the Nethercott dogs was the better. That more believed in Pocatelli than in Barge was indicated by the former being made a favorite in the betting at 5 to 4.

Barge clearly showed his superiority over Pocatelli. He led in the first two rounds, and despite the fact that the hare favored Pocatelli in the third round at a critical turn, he dashed past the other dog and made the score that saved him. The scores were: First round, 5 to 5; second, 3 to 1; third, 5 to 4.

The open stake was one of the best

that save to 4. The open stake was one of the best run in a long time. The hares were much stronger than usual. The coursing was very even, the dogs running close to form. Richard Anton was a 7 to 2 favorite over Palo Alto in the deciding course, but was beaten in a very close race.

THIRD BATTLE OF BULL RUN.

GEN. CORBIN WILL TRY TO EX-CELL STONEWALL JACKSO

Lead 22,000 Men Over the Famous Field of Manassas to Show How

[Washington Times.] Maj.-Gen. Cor-bin will fight the third battle of Bull Run. The General Staff of the army is now engaged upon improving the strategy of Gen. "Stonewall" Jackson n what is regarded by military strategists as the most masterly campaign of the Civil War. From Portland, Me., which never

came nearer to war than seeing in the coming Spanish fleets which never existed; the army maneuvers will be transferred this year to Manassas, VA., which still bears marks of the eavy blows dealt by blue and gray forty-two years ago.

For the first time an opportunity

will be afforded for effective compari-sons between the old army which fought and the new army which is be-ing trained to fight. Can the modern armament and the methods of trans-portation which have developed forty years from the days when Pope and Lee raced from their respective bases to the battleground change the result of their maneuvers? Twenty-two thou-sand modern soldiers will be used to sand modern soldiers will be used to test the prowess of the ancient armies of the rebellion and prove what would have happened had the commanders whose names made history, possessed Krag-Jorgensen riftes, Dougherty wag-

There have been few alterations in the general make-up and characteristics of Manassas since the rear guard of Gen. Pope's army fell back to Washington. Railroad lines and roads which afforded the old combatants their only methods of transportation other than that afforded by the country roads, have not changed. The lines shown upon the map of 1863 are still sechanged, except that upon what was the left fiank of the Northern army there has been constructed a road between Alexandria and Fredericksburg, and a line across what was the base of the Southern army from Fredericksburg to Chariottesville. These latter lines would so materially have affected the operations of the Civil War that it is probable, if the General Staff follows its plan of reproducing the campaign of 1862, they will be barred by the umpire.

with whom soldiery is an occupation secondary to that by which they make their living, are better able to leave their offices and shops during the dull summer months. When the wheels of commerce and insustry begin to limber up in September it is not so easy for them to absent themselves from the city.

The same strategic polats which played such a vital part in the pontest of military science waged between Gen. John Pope, the Federal leader, and Gen. Robert E. Lee, Confederate, stand the same to day as in 1862.

Maj. Gen. Henry C. Gorbin, commanding the Division of the Atlantic, will be in supreme command. Lieut. Gen. Adna R. RED VIRGINIA MUD.

To this day, wherever the veterans of the campaign of the great rebellion gather and stories are told, "red Virginia mud" has a prominent place. It is declared there is no "stickler" mud in the world and no time when it is "stickler" mud in the world and no time when it is "stickler" mud in the world and no time when harvest months.

The campaign of 1862 was fought for the most part by veterans of at least a year's standing. There were four regiments from in or near the difference between the pavements of the leisand of Manhattan and the shfting slush in the wake of a Virginia raisstorm. It is considered highly probable by army officers that the regiments from the State of New York, so fortunate as to be allowed the opportunity to attend these maneuvers will be apt to escounter some inconvenience before they equal the record of Gen. "Stonewall" Jackson when he fought twe armies in the same day beyond Thoroughfare Gap at points fifteen miles of red clay apart and won the strategy of the game of 1862.

CO-OPERATION OF MILITIA.

Cooperation of militial with regular troops, which forms the basic principle of the national scheme of defense, will be afforded through operation in these maneuvers. Gen. Corbin recently went to Virginia, to make arrangements for obtaining permission to operate upon the land desired as fighting ground. Properly owners told him the army could begit to operate there the first week in September, when the harvest will have been completed, and there will be no danger to crops from the march of infantry, cavalry, or artillery.

"One of the things," said May smythe, that the other speakers have not told you is what a ruissionary is, and now I'm going to tell you that. My name is just Smythe: slightly different from Smith, and yet fortunate, and I want to tell you what I am is Chinese. When I first went to China the native Christians held a meeting and asked me to be present.

"I was asked to speak my name, and over and over again I said Smythe.' They consuited, and said it after me as near as they could and then promounced my name Sie Mi Ge.' Now, here is the interpretation, if you please: 'A beautiful American Methodist preacher,' I was very proud until I learned that they call the small-pox beautiful flowers."

His entire talk was a treat rarely to be heard.

He said he had made a careful discourse to a group of natives seriel on the floor, when he told them he would be giad to answer any questions they might ask. Instantly one of them 'uneed up and asked: "Will you please explain to us why you have two buttons on the back of your coat?"

Bishop Walden presided, and while introducing Miss Hilmer of the Mother House of the German branch of the organization in this country, located in Cincinnati, referred to the fact that the first work of this nature in connection with the Methodist Church, was established in Germany.

Miss Hilmer stated that the object of the Mother House was the training of young women who are consecrated to the work, in the right way. She described the home life of the establishment as beautiful, the spirit of love and of Christ pervading everything, thus uniting all and making the arduous work comparatively easy. She inought it the most important of missionary or parent work for the reason that these women were given the opportunity of seeing so many different classes of people whom they could benefit, and from the nature of this work were enabled to pendirate homes where ordinary church workers could not think of going.

Miss Wardell of the Chicago Training School believed that if womanhood ever reaches its proper sphere of giory, it will be done through helping the needy. She said the work was in its infancy, but already there were established three old peoples' homes; one at Chicago, where there are 38, and at Spokane. I Orphanages throughout the country were housing 325 children, and 22,000 sick had been cared for during the past year. Principal facts have been in connection with the

aking, opening and consideration of ds for this important work, vis: (I.) The bids have been opened by a Sewer Committee of the Council. This committee has thus far been

to agree upon any of the , and has passed the whole mat-to the Council and the City body for its setion. (3.) There separate bids upon the work by ions (six) and upon it as a whole. The several sectional bids, when ad together, make a figure much than that upon the entire work. Most of the bids are from local ters, some are from bidders beyond city. (6.) The local construction pany which has put in a bid for work as a whole is objecting to consideration by the City Engineer the Council of any bids from out-bidders, notwithstanding the fact the Council invited bids from discities through advertisements published.

se are the preliminary and fun-tial facts in the case, as The inderstands it. In these facts as a basis for con-tag the subject, it can be treated

nates of the City Engineer, but two bidders upon the a whole, one of them being an the other; and the lowest

al bids which are lower than the Engineer's estimates upon those loss of the work. These lower are inpon sections 2 and 5, while bids on sections 2 and 5, while bids on sections 2 and 5, while bids on sections 1, 4, 5 and 6 are, seems, higher than the City Reser's estimates covering the probost of those sections. The against of the bids by sections is 356, while the lowest lump bid 156,000—an excess of \$31,744. It case as it stands seems to be plaid. How the Council can be do accept this higher bid in the of the lower figure presented by aggregate of the sectional bids it micult to see, and that body canbe expected to take such course our reasons which do not yet apupon the surface. As the matter is, it is largely in the hands of Engineer Stafford, because the cil relies upon his expert knowland his integrity in making to such a recommendation in the insection and the follows. on the suich a recommendation in the remises as they can safely follow. It assumed as a matter of course, y all officials, as well as by all citions who are seeking just and hopest years, that there will first be a careful, the foreign and expert investigation if the whole matter before any final cition is taken. The bidders, their climbility, their experience, their comvetency, and all similar conditions affecting the case, should be rigidly invited into: and what is equally or tore important, the sufficiency of the ond to be itipes in any and every are minst be settled to the entire satisfaction of the Council. All these council and the City Engineer for onsideration and settlement.

If is assumed that these officials are in on the qui vive, and mean to guard he interests of the city at every point. The competing bidders will enter mit a keen soniest for contracts so arree and prizes so rich, and will bring new honor to the city. A plan has been formed, and and, can produce. The idea is an excellent one and merits the support of world what a Southern California band, and particularly a Los Angeles will well be consummated, to place the band in the California Building at the consumated, to place the band in the California Building at the consumated, to place the band in the California Building at the consumated, to place the band in the California Building at the world what a Southern California band, and particularly a Los Angeles will well and official scrutiny which it must recessarily undergo. The objection hat some of the bidders are nonveidenta-is not good; the city is end itled to the benefits of competition, and matter whome of the proposition will be proposed the consummated, to place the world what a Southern California band, and particularly a Los Angeles will win new laurest through the country, and the ensemble playing, under the leader-ship of the tity is end itled to the benefits of competition, and matter whome of the proposition will be a support of our cities and the city is end in the city o lem such a recommendation in the comises as they can safely follow.

I is assumed, as a matter of course, y all officials, as well as by all citions who are seeking just and hopest poults, that there will first be a care walfs, that there will first be a carewal, thereugh and expert investigation
of the whole matter before any final
office the whole matter before any final
office the case, the bidders, their
eliability, their experience, their comelency, and all similar conditions afacting the case, should be rigidly in

All these caints will come directly before the louncil and the City Engineer for conferration and settlement.

It is assumed that these officials are all on the qui vive, and mean to guard he interests of the city at every point. The competing bidders will enter the interests of the city at every point. The competing bidders will enter the interests of the city at every point. The competing bidders will enter the interests of the city at every possible influence to bear upon he Council, each in his own favor;

stoppage of the work, readvertising, and the making of new contracts, with possible ultimate loss to the city. So the words "lowest and best" become

the words "lowest and best" become words of potent meaning in the award of large contracts of this kind.

All illegitimate combinations among bidders, all blind bids, all straw bids, and devious work of whatever sort, in the attempt to boodwink the Council, should such attempts be made, ought to be frowned upon and made to recoil upon their authors.

As to the demand for readvertising, should it be preased, the proper reply is obvious. If it can be shown that there is fraud, collusion or corruption

is obvious. If it can be shown that there is frand, collusion or corruption by and between bidders; if any of them are found to be irresponsible, or if the bids are found to be inordinately high, then there will be sufficient reason for readvertising. But if the motive for urging that dourse be merely a desire on the part of its advocates to "job" their successful rivals in the bidding heretofore made and the bids already opened, then there would seem to be no sufficient reason for readvertising.

The total cost of the outfall sewer will approximate a million dollars, for the bids do not include the brick and cement, which are to be furnished by the city at an estimated cost of between \$200,000 and \$250,000; besides, there will be incidental expenses aggregating no inconsiderable amount. Such a contract, as a whole, or such contracts by sections, are so important to the city and to citizens as to justify and require the most watch.

portant to the city and to citizens as to justify and require the most watchful attention of the minnicipal body. It is likely that there will be charges of cunning and perhaps crooked work in connection with the bidding and the awards: but the Council has only to move in the straight and narrow path of duty, looking with an eye single to the common wolfare, and its action will be sustained by the judgment of the people.

The situation, the facts of it, and the important considerations involved, make the City Engineer a factor of the first consequence, and his intervention and advice are indispensable to the Council, in order that right results may be reached.

Channing Ellery, manager of the Ellery Band, has been insking a courageous resistance, which has at times seemed hopeless, against the attempt of unionism to wreck his splendid musical organization. On the most unwarranted pretexts the band has been attacked by "organized labor," so called, and the latest move of the agitators is related elsewhere in this morning's Times.

morning's Times.

Union leaders are trying to close the World's Fair to the Los Angeles hand, and no effort is being spared to keep the organisation from appearing in St. Louis. Although Manager Ellery has contracts for an engagement of several weeks there, he may be forced to surrender them, and thus be deprived of the honor, the financial returns and the opportunity for fame which an engagement at the World's Pair would afford.

There is no need to call attention to the musical excellence of the band. It has made a high reputation on the Coast, and throughout the country, for that matter. Los Angeles is proud of it, and the band members, one and all,

A plan has been formed for a syste-matic campaign to bring to the Pacific Coast next year as many as possible of the important conventions held in St. Louis this year. It is proposed that the leading Pacific Coast and Far West Angeles.

THE PEOPLE AND THE MACHINE."

LIGAN STATE CONVENTION.

The Republican Convention at Bacramento last week offered in all respects as strong a contrast to 'that of the Democrats at Santa Crus as could well be imagined. The sharp contrast was found in the personnel of the two bodies, in their ways of doing business and in their way of regarding the condition of the country. There were many men at Santa Crus of high intelligence, high purpose and high respectability. But that class formed on all three

of the world. The political linen at Sants Crus was dirty, indeed, and there was an abundance of it. There is much room for question as to how much cleaning was accomplished. At Sacramento, whatever there was of the kind was done in caucuses of the several counties or districts. Here all differences were adjusted in one way or another, and when the convention met to do business every delegate knew Just what was to be done, who was to do it, and the programme went through as smoothly as an eel gildes through still water, making no splash nor sound. To vary the simile, there was not one cog in the machine that slipped. Indeed, we might go back further, and say that the programme was all arranged long before the primaries were held.

How was this done? In this way: There is an organization in the Republican party which is found in every precinct in the State. It is known as the "machine." This organization never dies. It is doing politics more or less all the time. Many weeks before the primaries were called conferences were held by those who compose this "machine." and it was in good time decided who should go to this convention, who to that, When the primaries came of the "machine" had its programmed ticket in the field, and in nearly all cases there was no other. The managers saw to fit that enough of their followers voted to elect the

Bonetimes unfit men get into office or have honors conferred on them. and this is not the fault of the whole conventions beid, and their action is final as to their own representatives. Los Angeles delegates had no hand in selecting delegates to represent the National Convention. They have to confirm such selection, it is true, and here is a check on corrupt political clans which is not always exercised. Is this a good and commendable way of doing our politics? Emphatically not The method is here by sufferance. It will be let alone so long as it does no flagrant wrong. If it makes political shoes we can all wear easily, we will let it go on making these things. Whenever we feel the shoe pinch, we shall kick it off and hurt the makers in the doing of the act.

The blame for bad politics should not be laid at the door of the "machine" too exclusively. Those who do politics in a faulty way at least do their duty in some way. Those of us who sit by and let them do it in a had way are more to blame than are the people who "run the old machine."

The cities, the commonwealths of the country, and the country as a whole will not have perfect representation in

Sacramento and have confidence in these good qualities in the masses, with a serene confidence that when a "machine" becomes notoriously corrupt, and therefore very injurious, the people will "smash" it.

There is one clause in the Republican platform which merits the highest commendation. Though brief and incomplete, it has so clear a ring of true Americanism in every syllable of it that it should be apread broadcast over the country. It is where the declaration is made that "every American everywhere shall be protected in all his rights."

WHY THE SOUTH WAS DEFEATED

all arranged long before the primaries were held.

How was this done? In this way:
There is an organisation in the Republican party which is found in every precinct in the State. It is more or less all the time. Many weeks before the primaries were called conferences were held by those who compose this "machine." and it was in good time decided who should go to this convention, who to that. When the primaries came off the "machine" had its programmed ticket in the field, and in nearly all cases there was no other. The managers saw to it that enough of their followers voted to elect the ticket. These delegates, all programme men, went to one convention and elected programme men from their earn body to go to the next convention.

Why do these men who compose the "machine" take so much integest in politics! in large measure because they like to, "do politics:" in some its stances because they like to, "do politics:" in some its stances because they are working in the interest of some great business enterprise or corporation.

Why do not the masses of Republican electors take this out of the hands of the "machine" men? Mostly because the "machine" men? Mostly because the "machine" men? Mostly because the mass takes no interest in politics. and partly because the "machine" men? Mostly because the mass takes no interest in politics. and partly because the "machine" occasionally does decent politics. The delegates generally, and been ignored by John C. Lyrich, and the programme in hand. The found the programme in hand. The found the programme in hand in the first of concede two delegates to the refusal to concede two delegate

And the arch of the rainbow is still to climb
And the fairies to find in the dew!
Will you not wait for the children?
Time! The days are shart for reaping
Mirth, but ah so long the weeping.
And the wreath
Withers oft before its spiding.
Or unwinding.
Pales to death
Leave them to their wild spower braiding.
With the kind blue sky above them,
For those wreaths, the swiftly fading.
Last as long as oblid hearts love them.
We dore not climb.
And the fairies for the children.

CITY LEAGUE BALL

CITY LEAGUE BALL.
TWO GOOD CONTESTS.
The City League teams put up excellent baseball yesterday afternoon at Chutes Park and furnished considerable excitement for over three hours for about seven hundred fans. During this time they saw about everything that comes up in ordinary baseball except a fight and a home run, and as none of the spectators quit, it is fair to assume that they got what they were looking for.

The programme consisted of a double header for the price of one admission, the Hamburgers and the Woodmen playing the first game and the Owis and Tufts-Lyon team the second. Both games were close and interesting, the Woodmen winning theirs by 5 to 3 and the Tufts-Lyon beating the Owis by a, 4 to 2 score.

The Hamburger-Woodmen game was a pitchers' battle between Hitt and McDonald, with Hitt on the best end of it. He allowed but three hits and gave but one pass and put up a very

carried to the clubhouse. It was feared at first that he might have to remain in Portland, but just before train departed, it was announced that he could make the trip. He was better after he was allowed to rest, and thinks he will be able to play the opening game in Ban Prancisco with Portland.

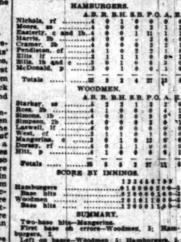

DUGDALE LOST TWO MEN.

BUT TOOK THREE GAMES.

ISY DIRECT WIRE TO THE TIMES.]

PORTLAND (Or.) May 22.—[Exclusive Dispatch.] When Dugdale left this evening for California, he was minus two of his best men, Shortstop Louis Castro and Second Baseman Spencer, both of whom are in bed and liable to stay there for a couple of weeks. They received injuries in the game, and were not able to continue. Consequently, Dugdale has been obliged to use a patched infield, Cartwright at third and Murphy at first, two amasteurs from Californias. Notwithstanding this, he took three of the five games.

Bishop Warne, with his wife and daughter of Toronto, Canada, were the guests of honor at a dianer parts given by Mr. and Mrs. A. M. Lee of No. 1823 Valencia street. The home was prettilly decorated, the dining-room effect being carried out in oriental style, suggestive of the land of the High Mogul and rich nabob, the parents of the host and hostess being Rev. David Lee and wife, who are successful missionaries in Calcutta, India. Fifteen covers were laid. Other guests were Rev. Dr. John Marquis of Redlands; Rev. and Mrs. J. M. Schnefle, Misses Lillie and Lida Lee and Arthur Lee. At the church of St. Thoinas the Apostle, Rev. J. C. lifford preached yesterday morning on "The Holy Ghost the Guiding Soul of the Church." The ladies of the parish are planning to form an altar guild, now that the many extra duties devolving upon them, from the erection of the new church, are becoming so urgent.

PLOTS AGAINST ELLERY BAND.

JEALOUS UNIQUETS LAY FOR IT

Plans to Invade California Build-ing May Make Designed Fiasco Mighty Triumph—Agitators Have Been Long Beelding an Excuse, Says

Union agitators among Eastern musicians are trying to break up the engagement of the Eliery band at the St. Louis exposition. The latest plan of the American Federation of Musicians is a subtice one, and the leaders of the exposition directors to oust the melody-makers from their official position at the great fair.

There is a meeting of some sort—a convention, rather—going on at New York at the present time, and the Ellery band has been on the rack for secret "consideration." This inquisition has been in process for some weeks, and the committee announces that it is endeavoring to ascertain whether the Italians may by man book or crook be classed in the "unfair" list—only they don't admit that they are hunting for the "hook or crook."

Some achemer has got the hooks into the frightened soul of George W. Stewart, chief of the St. Louis Bureau of Music. Under the date of May 10 he has written to the Ellery manager, demanding that Ellery square himself with the federation before the final contracts are signed for the engagement.

Bilery has doubts as to whether, the affair will ever be settled. He says: "I have found it advisable so far to remain in the union, and my men have paid dues and met all union demands with regularity. If through sheer jealousy thay force me out of the union, with none but a trumpedup cause, I will make the most sensational withdrawal they have ever seen, and in two weeks, at the fair I will give Los Angeles one of her biggest advertisements.

"I have written to Secretary Wiggins asking him if there is any objection to my playing in the California Building, as a part of Los Angeles and the more impressionable of them felt so had af leaving that they or the there will probably be enabled to carry out his discomfiting plan in trumph. Though he has endeavored receatedly to find out his atatus in New York City, the agitators reduce to give him an answer.

this being followed by Father Seward in an invocation. Then followed in turn the anthem, hymn 147, the scripture lesson, and an address by Rev. Mills, who took for his subject "The Church of God." After the singing of hymn 48, Rev. F. D. Seward addressed the congression on "The Mission of the Church to the World." Following hymn 48 there came a greeting from Rev. J. McLeod Gardiner of New Mexico, then a solo, Mrs. W. A. Arneill. The delivery of the hays of the edifice was made by J. S. Collins of the Building Committee, and accepted by T. H. Jones, chairman of the church Board of Trustees. Then followed the act of dedication, the audience, standing during the pretty eremony. All the congregation in unison repeating the following:

"Unto all these high and holy uses for ourselves and those who may come after us, we, Thy people, do this day solemnly set apart and consecrate this house, which through the gracious favor of Divine Providence we have been permitted to build: in the name of the Father, and of the Bon, and of the Holy Ghost, Amen."

There was another interesting programme of exercises in the evening, when all the ministers of the city and some outside of town narticipated, and made remarks untable to the occasion. Although those who made addresses were Rev. C. O. Mudge of Nordhoff, Rev. Dr. Morrison of the Methodist Church, Rev. C. N. Queen of the Congregational Church and Rev. J. of June.

A serious shortage of water is confronting the residents of Pico Heights, and in great distress they are praying that the time may speedily pass until the first of June, when the city will take charge of the West Side water system and will overcome the difficulties at present in the way of a sufficient amount of water for every householder.

The water famine has been reigning for a week past. The most serious condition is reported from the Berendo-street school. It is said that for three days last week at this school, which has nearly nine hundred children in strendance, there was no water in the toilets, and not even water for drinking.

ing.

One householder reported last night that residents who had their stoves and ranges connected with the water service had to disconnect them to prevent explosions or the ruination of their fixtures.

Another person said that for the past week it had been almost impossible to coax enough water from the pipes to keep things growing on a fity-foot lot, and that their neighbors were getting up at midnight so as to ge enough force from the pipes to spray, their lawns.

"In case of a fire there wouldn't be

source, and that very soon. It is simply tempting the fates to let things run in the present condition."

It seems that the Pico Heights district is "just between hay and grass—that is, the West Side Water Company's interest in the water system will cease on the first day of June, and that it is not willing to undertake any extensive improvements during the short time that yet remains until the transfer of the system to the city. The Pico Heights district has had a remarkable growth, and there have been so many water connections made that the demands on the pipes have been too great.

Superintendent George Hanna stated last night that the reservoirs of the system were filled, and that there was apparently no diminishing of the supply at that point. The trouble, he claims, is in the distributing system, and he says that in several places it is necessary that cross-sections be placed to give sufficient circulation, and to feed the service pipes.

"All that we can do at present is to close up, the work we now have in hand, and get it ready to turn over to the city by the first of the Pico Heighty district have been discussed with Mr.

CORONADO TENT CITY, May 22.—
The first concert of the season was given this afternoon by the City Guard Band. The electric cars ran through to the city, and a large number of people from the San Diego side of the bay were present. About eight hundred tents are up. The word from the Tent City Band, which is making the grand circuit of Arisona and California, is that large numbers of people are attending the concerts and that great interest is being awakened in Tent City. The band will reach here June 13, but the formal opening of the city will be on June 1.
